

Finally. AED Inspections Made Easy!

AED readiness is essential. With the RediCheck AED inspection system, you can be sure your AEDs are ready.

Keep Your Response System Ready

As a responsible AED owner, you are required by industry standards and some state laws to conduct routine inspections of your devices to ensure they are ready in case of a sudden cardiac arrest emergency. Readiness Systems offers everything you need to effectively **inspect, track, and manage your entire AED fleet**, whether you have a thousand AEDs or just a few.

RediCheck™: The Most Complete Smartphone Based AED Inspection System Available

Hassle-Free AED Inspections

- ✓ Field inspectors can perform checks, capture images of status indicators, and record readiness and maintenance information in no time
- ✓ QR code scanning and AED inspection images create digitally verifiable documentation of your inspection and maintenance activities
- ✓ Email and text reminders ensure inspections get done

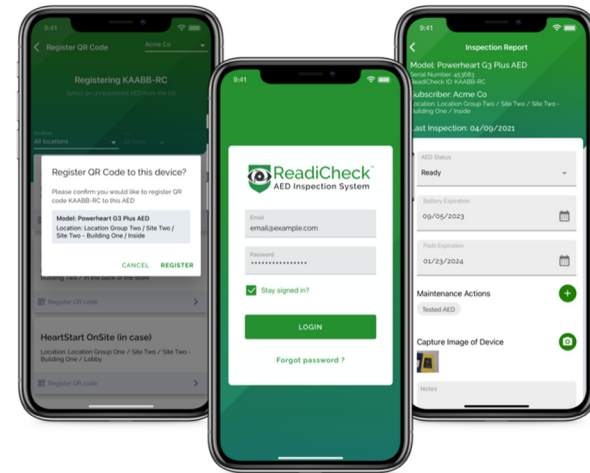

Effortless AED Fleet Management

- ✓ Manage your entire AED fleet from the secure, user-friendly, online AED Readiness Manager dashboard
- ✓ Know who inspects your AEDs, how frequently and when
- ✓ Upgrade your manual processes with smartphone-based inspections for accurate and verifiable compliance — no more paper forms, inspection tags or spreadsheets
- ✓ Get fully documented inspection reports
- ✓ Stay up to date with AED inspection reminders, and battery and pad replacement reminders
- ✓ Ensure AED readiness and manage legal risks like never before
