

# AED Readiness. Verified Daily.

## AED Sentinel®

### The Industry's Most Complete and Easiest to Use Remote AED Monitoring System

Automatic daily picture-based AED status checks. Alerts when action is required. Cellular connected. Online software for centralized AED management.

→ No Wi-Fi. No IT approvals. No manual inspections.

## What AED Sentinel does

### Capture

Daily status images + cabinet/case access detection

### Alert

Email/SMS notifications for:  
Status changes  
Battery & pad expirations  
AED access events

### Transmit

High-performance cellular communication (independent of your network)

### Manage

Monitor every AED from one centralized dashboard

## Why AED Sentinel

- ▶ Verify AED readiness every day
- ▶ Manage fleets of any size
- ▶ Reduce compliance risk
- ▶ Meet industry standards and regulatory requirements
- ▶ Monitor all AED makes & models
- ▶ Know when a cabinet or case is opened

# Monitoring for stationary & mobile AEDs

## Purpose Built to Monitor All AEDs

**AED Sentinel is the only system engineered for cabinet-based and mobile AEDs.**

Works in existing cabinets. Custom monitoring cases and dust/moisture resistant cameras protect mobile AEDs during vehicle transport, outdoor events, and emergency response.

→ Stationary and portable AED monitoring.

## Quick Facts

Keep batteries and pads current

4-year lithium-powered hardware.

No Wi-Fi configuration.

No new equipment or complex installation required

Use technology instead of people to check your AEDs.

No cellular/Wi-Fi AED battery drain.
