

READY. VERIFIED. EVERY DAY.

The only remote AED monitoring system that visually verifies the manufacturer's readiness indicator.

- ✓ No Wi-Fi or IT approvals
- ✓ No Manual inspections
- ✓ Cellular connected
- ✓ Stationary & mobile monitoring

Why visual verification matters

Manufacturers tell AED owners to inspect AED readiness indicators.

AED Sentinel remotely verifies those visual readiness indicators every day.

READINESS

Ensures AEDs are ready when needed.

RELIABILITY

Eliminates guesswork with daily AED checks.

COMPLIANCE

Supports regulatory compliance and risk management.

VERIFY

Daily pictures confirm AED readiness

CONNECT

Secure cellular communication independent of your network.

ALERT

Notifications when AEDs need attention

MANAGE

Monitor every AED from one central dashboard

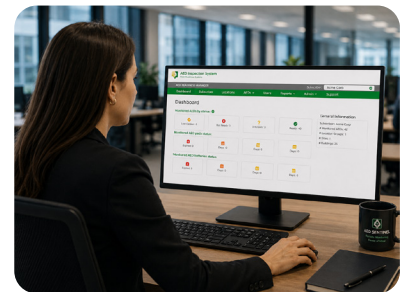

THE AED SENTINEL DIFFERENCE

- ✓ Verifies the manufacturer's readiness indicator
- ✓ Monitors all major AED brands
- ✓ Works with existing cabinets
- ✓ Follows manufacturer inspection guidance
- ✓ Meets regulatory inspection requirements
- ✓ Monitors stationary and mobile AEDs

MOBILE MONITORING

CENTRAL DASHBOARD

One system. Any environment. Continuous readiness.
